

We are dedicated to achieving the best possible outcomes for our clients. In every project we apply our experience to offer tailored solutions that go beyond a standard approach.

You might find that many arboriculture or tree consultants say that they can fulfil your requirements, so what makes ACS Consulting different?

ACS Consulting takes pride in being an industry leader. This is demonstrated through being awarded Arboricultural Association Registered Consultant (AARC) status. This award is for individual consultants who have attained and demonstrated an advanced level of qualifications and experience, and who have been subjected to rigorous examination by a panel of expert assessors.

What's important to us is that we help our clients to formulate the best possible solutions for them, whilst taking into account the environmental wellbeing of trees both now and in the future.

Providing thoughtful, expert advice to...

Architects, planners, property developers, volume house builders and landscape architects on the suitability of trees on development sites – not just now, but also in the future.

Our comprehensive range of services includes:

- Preliminary site appraisals
- Comprehensive assessment to BS5837:2012
- Technical analysis of planning issues
- Preparation of planning briefs
- Project coordination including the instruction of contractors
- Provision of expert evidence at public inquiries

Planning appeals

With our expertise, our experienced team can help arboricultural elements of planning appeals, supporting you by:

- Representing your interests with expert evidence for hearings and public inquiries
- Pursuing all appeals in writing and creating a succinct, carefully researched statement of your case

Planning applications

Our caring team support you at every stage of the planning application process:

- Advising on the suitability of trees to be retained on development sites in accordance with BS5837:2012
- Managing tree quality on-site
- Suggesting effective protection techniques to retain trees and minimise construction stress
- Offering professional representation at meetings and public inquiries
- Giving planting programmes to enhance new developments
- Assisting with Method Statements of Implementation for special engineering features (in full accordance with BS5837:2012)
- Supplying trusted guidance on Tree Preservation Orders and Conservation Area Orders
